SUBJECT: TURKMENISTAN: ASHGABAT MUNICIPALITY FAILS WINTER
TEST

¶1. (U) Sensitive but unclassified. Not for Internet
distribution

¶2. (SBU) SUMMARY: The shortcomings of Ashgabat's
municipal services and emergency preparedness were
vividly illustrated when a heavy snowfall hit the
Turkmen capital on February 12. Icy roads crippled
both public and private transport, creating
additional difficulties for workers trying to get
to and from work. Except for central areas and the
route to the president's home, the rest of the
city's roads were completely neglected.
Particularly noticeable was the lack of public
information about road conditions and public
transport disruptions. As a test of the
government's ability to communicate with
the public in an emergency, the snowstorm showed
there remains a lot of room for improvement.
END SUMMARY.

¶3. (SBU) On February 12, a heavy snowfall
paralyzed life in the Turkmen capital. Temperatures
dropped down below 14F at night and barely
reached 32F during the day. Traffic was
primarily affected by icy, slippery roads, which
seldom occur in Ashgabat. The municipality
appeared unprepared to react to the heavy snowfall.
Apart from some central roads and roads along the
president's route home, no other roads were cleared
of snow or treated with salt or sand. Minor
traffic accidents multiplied. Traffic police
restricted access to some main arteries to avoid
mass traffic accidents. This led to heavy
congestion in the city center.

¶4. (SBU) Public bus transportation was crippled as
many buses were inoperable due to their tread-worn
tires. Since the public was not informed about the
severe reduction in bus service, bus stops were
full of people trying to get to work or school, and
those few buses circulating in the city were
packed. Private, usually ubiquitous, taxis were

difficult to catch since many taxi drivers also stayed off the slippery roads. Drivers that did pick up passengers grossly overcharged. An Ashgabat resident who lives in Mir district said that for a ride home from the city center during the storm cost 10 Manats (approximately \$3.50), while normally she pays only 2 Manats (\$.70). She said, "It was very difficult to catch a taxi, I spent an hour trying to get one, and then nearly another hour to get home, while usually it takes only 15 minutes for me to get home from work." The situation was even more difficult for those who live outside of Ashgabat.

15. (SBU) COMMENT: While snowstorms and blizzards like this one are not ordinary occurrences in southern Turkmenistan, no one is surprised when they do occur. The heavy snowfall of February 12 revealed the Ashgabat municipal authorities' lack of preparedness in the face of an extreme weather event. Especially noticeable was the government's failure to provide public information about road conditions and transport disruptions. In the event of other possible emergency situations, it is not likely that the government's response would be any more effective. END COMMENT.
